Analytics On-Site

## Sanjoy Chatterjee

Director of the Board and CTO of  
Ideal Analytics Solutions

### "Think, Think-on, continuously..."

Sanjoy is better known as a technical guru among his peers and followers. A rare blend of Science & Arts differentiates him from the rest as a renowned personality. He can depict solution architecture suitable as per business need. After completing his M.Tech from IIT Kharagpur, he went on to become a senior consultant at TATA technologies. From there onwards, he gained ample expertise as a project manager.

However, his true ingenuity came to the forefront when he decided to launch his own company, Ideal Analytics Solutions. It provides self-service analysis tools, which helps business users discover facts in their data enabling them to work independently and take accurate business decisions. Over the years, the company has created a name for itself, with more than 20 enterprise clients and over 2000 cloud customers.

Please provide a brief overview of your product/ service

Ideal Analytics provides proactive business suggestions using business rules and advanced statistical & data mining techniques.

**Business Insight** – Ideal Analytics provides insights of the business scenario, critical metrics & KPIs through interactive dashboards and ad-hoc exploration.

**Business Exceptions** – Ideal Analytics allows users to define rules and benchmarks related to business exceptions, abnormalities or anomalies. Ideal Analytics prediction & forecasting engine along with the real-time messaging infrastructure will identify the patterns and reports back to the user.

**Business Guidance** – The intelligence engine runs in the background and keeps on refining the hidden parameters and discovers known / unknown patterns relevant to the business outcome.

**What inspired you to build the above product/ service?**

There were not many state-of-the-art India-made i-products vying for the Global market. We foresaw the business is going to grow digital and analytical in the future. Analytics could not transgress the R&D design boards into brass-task business. That gap excited us to build our product

**What is your life mantra?**

Candle in the wind!

**What was the most challenging part of your journey till now?**

How to make an Indian product start its journey from Europe, hit the global market, and then come back to India.

We wanted to treat the reverse model (global-to-local) as a new mode.

**How did you overcome those challenges?**

Zero-Cost-Marketing approaches with partner inter-dependence.

**Share some details about the investments that you have been able to fetch for the business till now.**

No external investment used so far. Learn to grow with the customers.

**How do you protect yourself from the problem of Brain Drain?**

We have ZERO attrition because of our flat hierarchy and innovative valorization of the team members – We are a team, not employees.

**According to you, what are the three qualities an individual must have to achieve success?**

Zeal for Innovation – Respect Failure – Never Satisfied

**Which online tools/ services/ apps do you use the most and would like to recommend as well?**

Ideal Analytics

**Share any one habit which you think makes you more productive.**

Challenging each other (within the team).

Share any one habit which you wish to change in yourself.

Too much restlessness for changes.

Answer in less than 50 words

• **One tip to success:**

Incessant dissatisfaction

• **One mistake you believe every individual must avoid:**

To leave the track when faced with a hurdle.

• **One most important lesson that you have learnt till now:**

The loyalty of Smart Individuals working in a dedicated collective.

What are your plans for next 3 years?

Changing...

If you get a chance to start your career again what would you do differently this time?

Deep Ocean Navigator

What are your top three getaway destinations?

Andaman, Burma & Horn of Africa

What are your top three getaway destinations?

“Bhabo, Bhabo, Bhaba Practice Koro...” [Think, Think-on, continuously...] – (Ritwik Ghatak)
